

SOS Children Bringing learning within reach

SOS CHILDREN'S
VILLAGES

A loving home for every child

Basic education is one of the most effective ways of helping people to help themselves out of the poverty cycle. Lack of basic education keeps generation upon generation in the same poor living conditions.

SOS Children builds and runs nursery, primary and secondary schools. Our SOS Vocational Training Centres provide essential skills training so that young people have skills to live an independent life and carers can provide for their families while their children go to school.
